To Whom It May Concern:

This letter is to express our thanks and appreciation to Tom Turner and Brent Meckley. They have been very informative and cooperative while explaining all the different types of roofing options available.

I have worked for the Milpitas Fire Department for 24 years, so I have first hand knowledge of the types of roofing that are the safest and most fire resistant. Of course, this was my first priority when choosing a roof. Tom and Brent explained each of the options available to me – and my wife and I are very happy that we have chosen the Metro Shake 2 metal roof. Because of the fact that this type of roof is light-weight, earthquake-proof, fire-proof, and has good walk-ability, it was the choice for us.

Sincerely,

Frank Martorella
